INNOVATION FOR LIFE

Prestige Biologics supports the entire pharmaceutical development process, from early-stage bio-pharmaceutical development to commercial production. We offer optimized services that meet various customer requirements, including contract development (CDO), contract manufacturing (CMO), contract packaging (CPO), and contract engineering (CEO).

With the pride of contributing to the development and production of life-saving pharmaceuticals, Prestige Biologics has fully established the capacity to manufacture recombinant protein pharmaceuticals based on animal cells. We also aim to supply high-quality pharmaceuticals that contribute to human life by building a stable supply chain.

ONE STOP SOLUTION

In the biopharmaceutical market, where timing is crucial, Prestige Biologics offers a One-Stop Solution service, allowing customers to launch their pharmaceuticals to the market quickly and efficiently without the hassle of multiple contracts. With specialized professionals deployed at every stage, we build processes to manage customer products, enabling us to respond promptly and efficiently to customer requirements.

We continuously communicate with diverse customers and upgrade our services from the customer's perspective. As a pioneering company in the biopharmaceutical manufacturing market, Prestige Biologics will strengthen its leadership position in the future.

The Right CDEMO Partner for You,

The Best Solution for Biomanufacturing

Prestige Biologics has established the first Full Single-Use-System in Korea. Single-Use-Systems have the advantage of lower contamination rates and reduced cleaning times between batches compared to traditional Stainless-steel quickly. We provide integrated CDMO services with a Full-Value-Chain and comply with cGMP management standards to ensure high-quality pharmaceuticals.

Engineering

To enable customers to respond flexibly to the rapidly changing pharmaceutical industry environment, Prestige Biologics offers customized process design, competitive pricing policies, flexible contract negotiations, and production facilities of various scales. In particular, Prestige Biologics provides the optimal solution for customers, from facility design to clinical trial and commercial production, based on the 'Alita Smart BioFactory™'. Through customer-oriented and rigorous development, we provide quality stability and guarantee compliance with production deadlines for customer projects.

- Optimal process engineering : customized manufacturing facilities and process design for products
- Improved productivity engineering : elimination of process bottlenecks to reduce process time and increase batch rotation
- Cost-saving engineerign : labor-saving through digital AI-based processes and the Single-Use System.

Storage/Packaging

Outsourced packaging services are a crucial process in ensuring the safety, stability, and efficacy of biopharmaceuticals. Prestige Biologics provides integrated packaging services from clinical trial samples to commercial pharmaceuticals.

- Product and material storage services
- Clinical trial double-blind packaging services (secondary packaging)
- Product shipping and cold chain transportation services

Warehouse Capacity

Site	Storage Facility	Storage Capacity	Temperature Range
Campus II	Ambient Temperature Storage	3600 Pallets	Ambient Temperature Storage(15~25℃)
	Refrigerated Storage 1	78 Pallets	Refrigerated(2~8℃)
	Refrigerated Storage 2	66 Pallets	Refrigerated(2~8℃)
	Frozen Storage 1	78 Pallets	Frozen(-25~15℃)
	Frozen Storage 2	66 Pallets	Frozen(-25~15℃)

Prestige Biologics' upgraded
CDMO services offer excellent
efficiency and productivity.
